### **DYNASTY EXPANDS URANIUM EXPLORATION IN BOTSWANA**

Emerging uranium and energy company Dynasty Metals Australia Ltd **ASX: DMA**, ("Dynasty") today announced its strategy to significantly expand its uranium portfolio by applying for uranium exploration projects over five prospective areas across Botswana.

Dynasty Managing Director Rita Brooks believes this is a significant opportunity to expand into international uranium exploration and diversify the Company's Australian-based projects.

"Africa has a long-standing mining industry and supportive uranium exploration and mining policy." Ms Brooks said.

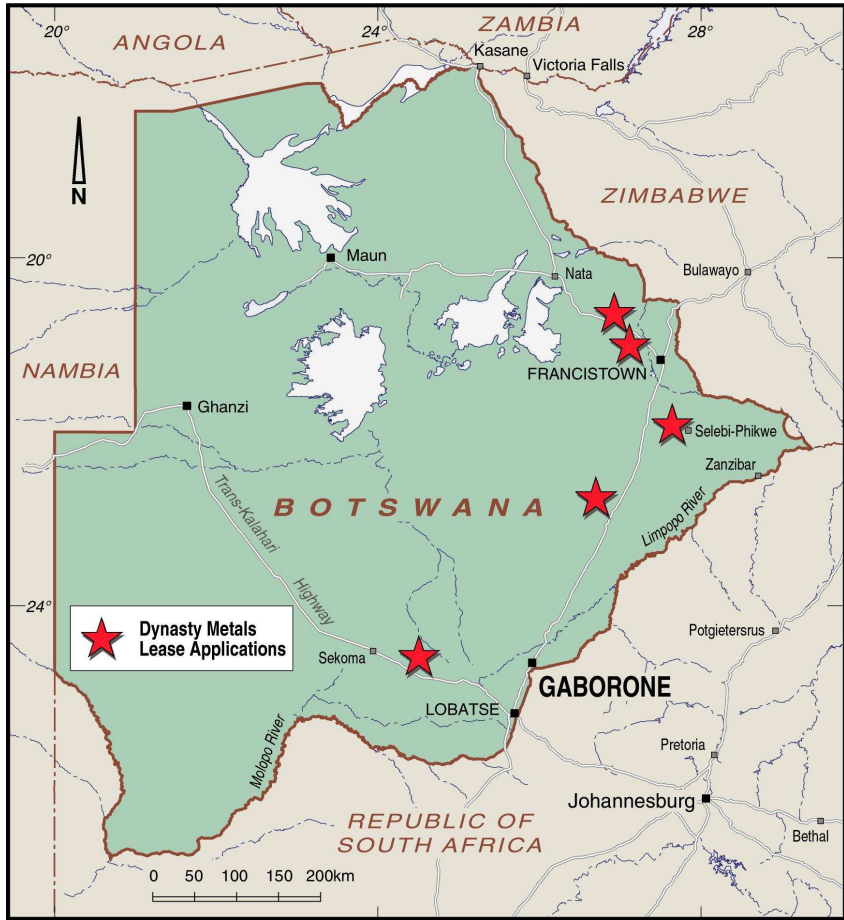

"With a number of uranium exploration projects underway in Botswana and advanced mining in neighbouring Namibia, the company's Botswana projects represent great opportunities for new project development" she said

The projects are situated in the historic mining rich province of Selebi-Phikwe and Sekoma in close proximity to Francistown and Botswana's capital city Gaborone.

Botswana has an established diamond, gold and nickel mining industry. A-Cap Resources, African Energy and Bannerman Resources are currently developing uranium exploration projects in Botswana.

Dynasty will expand its exploration team to reflect its growing portfolio and commence exploration once the licences have been granted (see map attached).
