Dynasty Farm-In Agreement with Tiaro Coal

We are pleased to refer to the attached announcement released today of the execution of the Farm-In Agreement pursuant to the Heads of Agreement (HOA) announced on the 28th April 2008.

Under the Farm-In Agreement, Dynasty has the right to acquire up to 51% interest in each of **EPC 956** and **EPC 957**.

As noted in the Heads of Agreement the best coal intersections encountered in 53 holes of approximately 5000 metres drilled to date by the Tiaro Joint Venture (TJV) are in the Farm –In tenements of **EPC 956 and 957**. The execution of this agreement will enable the TJV to further progress its drilling program in these tenements towards an initial target resource of 20mt of marketable thermal and coking coal.

The initial \$750,000 will be spent on a comprehensive Seismic Lines program and initial drilling program.

As stated in a previous announcement 28 April 2008, Jacob Rebek, former Group Geologist for CRA / Rio Tinto has noted “based on drilling to date, there are at least 3 areas within EPC 956 and 957 and that we expect that in at least one of the 3 areas, there is potential to define a significant coal resource.”

The Farm-In Agreement is subject to TEC formalising the consent and agreement of Jandale Holdings Pty Limited and Core Coal (Qld) Pty Limited, the other joint venture participants in the TCJV to vary existing agreements that are impacted by the Farm-In Agreement with Dynasty. It is not expected that consent will be withheld.

Attached is a copy of the Tiaro Coal Limited announcement made to ASX today regarding this Farm – In Agreement.

Dynasty Farm-In Agreement Concluded

On 28 April 2008, Tiaro Coal Limited - ASX:TCM - (**Tiaro**) advised that it had entered into a Heads of Agreement with Dynasty Metals Australia Limited (**Dynasty**) with respect to the Tiaro Coal Joint Venture (**TCJV**). The Farm-In Agreement has now been executed.

Background

Tiaro Energy Corporation Pty Limited (**TEC**), a wholly owned subsidiary of Tiaro, currently holds an interest in the TCJV and is the manager. TEC can increase its interest to 80% by funding exploration in the amount of \$5 million.

The TCJV holds Exploration Permits for Coal (EPC): 956, 957, 967, 972 and EPCA 1151 which is under application.

These tenements cover most of the known exposures of the Tiaro Coal Measures within the Mesozoic Maryborough Basin, located between Gympie and Maryborough in southeast Queensland.

The TCJV was formed in 2005 to undertake exploration in the Tiaro Coal Measures on the basis of wide ranged scout drilling to identify the existence of an economic coal mineralization.

To date 53 holes (50 open holes and 3 diamond holes) have been completed for a total of approximately 5,000 metres (average depth of a hole is 94 metres).

Coal intersections were made in several holes.

The exploration tenements are well serviced by nearby infrastructure, including manpower, mining support services, road and rail and port facilities.

The TCJV exploration tenements are located approximately 250km from Gladstone coal terminal by rail and approximately 200 km from the Brisbane terminal. The rail line bisects the exploration tenements.

Farm-In Agreement

Under the Farm-In Agreement, Dynasty has the right to acquire up to 51% interest in each of EPC 956 and EPC 957 (**Dynasty Earning EPCs**) for payments of up to \$5 million.

The principal terms of the Farm-In Agreement are:-

1. Stage 1: Dynasty to provide an initial contribution of \$750,000 towards exploration expenditure in the Dynasty Earning EPCs.

Stage 2: Dynasty at its election and by sole contribution of the next \$750,000 towards exploration expenditure in the Dynasty Earning EPCs will earn an initial 15% interest in the Dynasty Earning EPCs.

Stage 3: Dynasty at its election within eighteen months of signing the agreement and by sole contribution of the next \$1 million towards exploration expenditure in the Dynasty Earning EPCs will earn an additional interest of 15% being a total interest of 30% in the Dynasty Earning EPCs.

Stage 1 – 3 expenditure will be considered as contribution toward increasing TEC's interest from 33.33% to 80%.
2. Within twelve months of earning a 30% interest in the Dynasty Earning EPCs Dynasty may elect to increase its interest in the Dynasty Earning EPCs by an additional 21% by payment of \$2.5 million to TEC.

Following this payment Dynasty's total interest in the Dynasty Earning EPCs will be 51%.
3. Dynasty the right of first refusal to participate in TEC's disposal of its interest in other coal exploration tenements in the Maryborough Basin.
4. TEC will be the manager of an Offshoot Farm-In Agreement and re-stated Joint Venture Agreement for the Dynasty Earning EPCs.
5. The Farm-In Agreement is subject to TEC formalising the consent and agreement of Jandale Holdings Pty Limited and Core Coal (Qld) Pty Limited, the other joint venture participants in the TCJV to vary existing agreements that are impacted by the Farm-In Agreement with Dynasty. It is not expected that consent will be withheld.
